Transformational Business Cases

Inbound & Outbound Auditing

Greater inventory accuracy / Reduced shrink

- Enables immediate, documented claims against suppliers for missing or incorrect items
- No change to existing conveyor belt process, or we can integrate with your systems
- Highly automatable / Highly accurate

Pick/Pack Solutions

Complete product range of fully automated conveyor solutions, purpose-built tables, and table-top portable RFID Read Stations

- Enables immediate feedback on missing or incorrect items
- Clear and easy to use Clarity™ Operations software is fully integrated with backend core systems
- Full high-speed audit capability, with zero impact on staff time or existing workflow

Reverse Logistics Management

Timesaving returns management processes

- Reprocessing and grading of products using Clarity™ software via the touch screen reduces errors and improves efficiency
- RFID-enabled returns allow for rapid scan-in and sorting of returned products
- Faster, labor-saving more accurate returns management translates into higher profit margins

Handheld DC Solutions

Real-Time: From inventory accuracy to EAS, Clarity™ handhelds speedily provide vital data

- Outbound Shipment data can be used to validate WMS quantities which can drive real-time replenishment tasks
- Use RFID 'Geiger' to find misplaced items; locate incorrectly encoded tags
- Real-time product replenishment saves time and money

Supply Chain

The Complete Solution

To help retailers on their retail transformation journey, Clarity™ Supply Chain has so many configurable features.

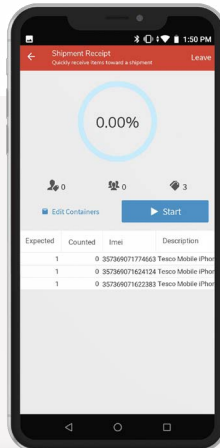

- Clarity™ Operations
- Clarity™ IoT
- Clarity™ Station
- Clarity™ Insights Reporting
- Grey Market Visibility
- Stock Count
- Receive/Receive Auditing
- Returns Management
- Tag Validation
- RFID Picking Validation
- RFID Audit Validation
- RFID Pack Assist
- Product Search
- Change Status
- Outbound Shipment Audit
- Tag Encoding
- Clarity™ Supply Chain API
- Clarity™ MobileX

...and so many more features. This is Clarity™ Supply Chain

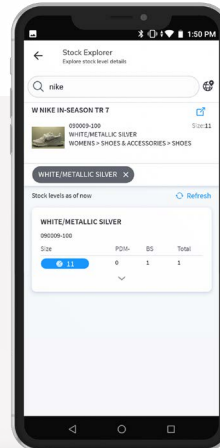

Active Stock Count

See stock count progress for your entire team

Shipment Receipt

Receiving shipments is fast and accurate

Stock Explorer

Quickly explore stock level details

Pick/Pack Auditing

Enables documented claims for incorrect items

Clarity™ Solution Topology

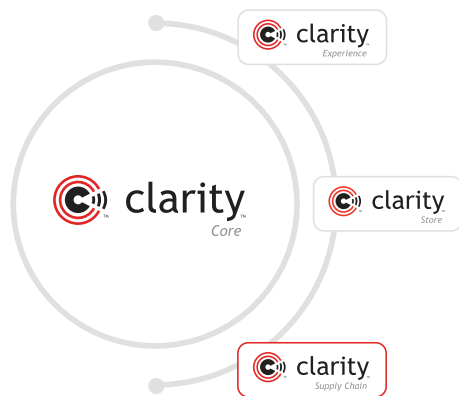

Clarity™ Core is where reliable integrations with retailer systems reside. It also performs all the item-level event management tasks that are critical for real-time store operations. Lastly, Clarity™ Core is where device-level interaction resides. Clarity™ supports a variety of handhelds and numerous fixed readers.

Item-Level RFID has Compelling ROIs

Clarity™ utilizes cutting-edge technology and architecture to create an end-to-end item-level inventory management solution that delivers maximum value with the scalability, integrability, and extensibility to grow and adapt with the needs of the enterprise to enable the use cases of today and tomorrow.
